

FUTURE FORESIGHT FOUNDATION

For Consultancy and Training

Future Foresight Foundation for Consultancy and Training

In a world that abounds with knowledge, progress, creativity and innovation, the United Arab Emirates, which posits human resources as the key element in development, has managed to play a pivotal role in foreseeing and building the future through crystal clear vision, planning, and working hard on implementation. Foresight and building of the future is no longer a theoretical concept. Rather, it has become a key factor in guaranteeing the persistence of countries within the circle of global competitiveness.

- Foreseeing the future represents a roadmap for next generations, which ensures prosperity and institutional positivism within internal and external environments.
- Management of public and private entities and foundations are now required to act creatively through keeping abreast of changes, sustaining innovation, practical application of knowledge and acquisition of ideas and skills, foreseeing the future as a way of work and an approach for developing futurist planning capacity, and developing scenarios that foresee and cope with future orientations.
- Since changes in the field of human development progress in accelerating pace, the entire community should constantly modernize its individuals' knowledge and skills in a way that ensures achievement of long-term sustainability.
- Hence, maintaining leadership and precedence draws from the support and development of individuals, entities and sectors through analysis of future strategic challenges to the different sectors, innovating models and solutions for such challenges in partnership with international research institutions.
- That is why future Foresight Foundation for Consultancy and Training seeks to employ a highly flexible training system in compliance with the needs of foundations, being the cornerstone of training plans for public and private entities.

Specialism:

- Indeed, the major constituents in procuring success and excellence for any entity lie in its ability to foresee the future, as successful planning for the future of any entity depends on availability of essential and prerequisite constituents. Such constituents include comprehensive understanding of the manner of foreseeing the future and its challenges, as well as training to use its tools for the formation of clear and accurate future visions that ensure constancy, success and excellence, and that guarantee keeping abreast of the caravan of progress, development, and international competitiveness.
- Thus, foreseeing the future is the capacity to know what would happen in the near and distant future, identify future challenges and the ways to overcome them, and seize future opportunities through employment of diverse tools and technologies.
- Future Foresight studies is a new scholarly discipline that focuses on polishing data and improving operations, on the grounds of which decisions and policies are made in the different fields of human behavior. Hence, such specialization aims at helping decision and policy makers choose wisely from among available alternative scenarios. In turn, these foresight studies not only draw on the givens of the past and the present, but also involve invoking and foreseeing potential future opportunities and choosing the optimum ones, and then developing strategic plans to achieve them.
- In order to foresee the future of any entity, we should first know the looming drives of change and future global orientations in the field of the study to be conducted. All this is achieved through practical steps and stages that are implemented through the assigned team in the foundation, knowing that future Foresight Foundation for Consultancy and Training is one of the entities specializing in foresight of the future, training and consultancy.
